## The Intelligencer.

OFFICE: NO. 15 QUINCY STREET. FREW, HAGANS & HALL,

L. A. HAGANS, Editors.
G. D. HALL,
John Frew, Business Manage

FRIDAY MORNING, APRIL 10.

A WASHINGTON dispatch says the the votes of Senators Grimes, Fowler and Van Winkle. We predict he counts without his host in the case of the latter.

before the Senate don't relate to "petit larceny," "trespass," or "assault and battery," It wouldn't do to convict a man of these offences upon evidence relating to "high crimes and misdomanors."

Mr. Jorsson is evidently fond of dramatic affects, although to never goes to the the theater. The extraordinary speciales at the the opening of the Pfliedelphie convention, which be witnessed through the medium of a telegraphic dispatch, brought tears to his syes. After a careful rehearsal therewers a scene at the last leves at the White House. Walter Wilkins, a tender youth of ten summers, approached the President, and stretching out his hands, said: "If o've the President with the statement would shad the product of the statement would show an increase of the dob. An analytzation of the figures shows that the outstanding obligations of the Treasury are decreased since March 1, 85, 477, 481, the cash behalves the cash balances on hand decreased \$5,87,812; net decreased \$11,05,000, difference, \$1,225,500. The Socretary has been selling bonds largely—in fact in crease of the public debt, \$600,986. The funded gold-bearing debt, is considered the statement would show an increase of the bold. An analyzation of the figures shows that the outstanding obligations of the Treasury are decreased \$11,05,000, difference, \$1,225,500. The Socretary has been selling bonds largely—in fact in crease of the public debt, \$600,986. The funded gold-bearing debt, is considered the selling bonds largely—in fact in crease of the public debt, \$600,986. The funded gold-bearing debt is increased \$11,05,000, difference, \$1,225,500. The Socretary has been selling bonds largely—in fact in crease of the public debt, \$600,986. The funded gold-bearing debt is increased since March 1, \$5,477,585. the cash balances on hand decreased \$1,240,510 at the late of the termination of the service of the public debt, \$600,986. The funded gold-bearing debt is considered to the service of the service of the gold and bonds, nall vectors. In reference to the gold b customs for the month, say by interest on the United States 10-40s to about one-third of the smount, and by sales of the remainder in the open market—leaving the balance of gold in the ownership of the Government, at the close of the month, \$81,537,558, as against \$81,924,015 at the close of February. The statement is the more acceptable from the fact that it is made in the face of an announcement that the War Department has drawn over thirteen millions of dollars from the Treasury in a single month, to defray army expenses. While the announcement of the expenditure of so large a sum from one Department in so short a time, must asionish tax-payers, who have to furnish the money, the fact that it has been paid and the National debt at the same time reduced, is gratifying evidence of the immense resources of the country, and cannot fall to give increased credit and value to the public securities. If the debt may be steadily reduced with such improvident expenditures for non-productive war purposes, what may not be accomplished when this and many other wasteful leaks at the public Treasury are stopped, as there is a dis-

Treasury are slopped, as there is a dis-position on the part of the people as well as of Congress that they shall be? The Wheeling & Toledo Railroad. gentleman at Flushing, Ohio. writes in regard to this projected enter-

prise as follows:
"We hope you will be able to secure "We hope you will be able to secure a practical interest in your city in this railroad enterprise. Our people are in carnest, and want the work to go on. We stand ready to act. We understood, when at the Wheeling Convention, from our friends in the north part of Ohlo, that they would grade and bridge, the road to Uhrichaville or Dennison, on the Steubenville & Indiana road, leaving Wheeling and this section of the Ohlo only 60 miles to build. Now, if Wheeling will only give a proper starter we think enough cas be added by subscription along the route to grade and bridge this 60 miles, and the bonds of the road can no doubt be negotiated to finish it. I might add that prompt action seems necessary to our success, as the Central Pennsylvania road has offered to furnish the rails and rolling stock if the North-west will connect with their interests at Dennison."

A letter from Canal Dover, Tuscarawas county, Ohio, is to the following

effect:

"We are gratified at the movement which seems to be taking place on the part of your citizens as indicated in the articles published in the INTELLIGENCES, and are pleased to notice the tone of those articles as being candid and just. The proposed road does seem to us of the greatest importance to your city as well as to ourselves here, and further, it seems to us that the more the subject is agitated and brought before the minds of your people and they thereby understand its practicability and the beneficial influence to your city, the more favorably they will be impressed with the suggestion of speedy action."

The above extracts indicate the interview.

The above extracts indicate the interest of the people over in Ohio, along the line of the proposed road. The project has been discussed, and popular attention has been turned to the subject for months past. Over on this side of the river the case is different; but our people are now a good deal better informed as to the merits of the enterprise, and more interested in it than prise, and more interested in it than they were a short time ago. We are yet in hopes that the city of Baltimore will commence the agitation of the most difficult with safety and ease; never will commence the agitation of the Druggists. Send for Phamplet, 13f Ohest musterest, Philadelphia, Pa.

Talden will commence the agitation of the matter at no distant day. If Toldeo, Wheeling and Baitimore were to put their shoulders heartly to the put their should be put beg the attention of our readers in this connection to the following article from 100 BBLS. NE PLUS ULTRA LIMETresh burnt received by P. C. HILDRETH & BEO.;53 Main.st.

per, of that city, as showing her rising importance as the terminus of a rail-road like that one suggested from here to Toledo, and from here to the Con-

the votes of Senators Grimes, Fowler and Van Winkle. We predict he counts without his host in the case of the latter.

Among the acts passed by the recently adjourned Democratic Legislature of Maryland was one reciting that in Centreville, Queen Anne's county, "the owner of every dog or bitch for which the latters and in competition with power individed the owner not wear the prescribed collar, the dog is to be shot, or otherwise destroyed, and the owner is to be fined!

If the President of the United States were on trial for petit larceny, or trespass, or even for assault and battery."

Yery likely; because the evidence before the Senate, "Not Gulity."—N. Y. Express.

Very likely; because the evidence before the Senate don't relate to "petit larceny," "trespass," or "assault and battery." It wouldn't do to convict a man of these offences upon evidence relatings to "heigh crimes and missie."

What this trade is a since stangular were in the least angular were petition. Since less that sun, and the value of its foreign exports and imports, the smallest immediate result, that even the least angular were peathous associated by the child result in the past of this one petition with power of railroad, running through different States and in competition with power in larvals, are too spt to be hampered. It is only within the past flow weeks, it may be said, when the last obstacles to the completion of the Connellsville Road have been removed, and arrangement, by hostile legislation, by want of means, and by every other kind of hindrance by which lines of the light in the past flow the propertion with power-its rail road, running through different States and in competition with power-its rail road, running through different States and in competition with power-its rail road, running through different States and in competition with power-its rail road, running through different States and in competition with power-its rail road, running through different States and in competition of the Connellsville Road have been rem

necessarily be a large market for naval stores.

But this is not all. The contents of this cargo will teach to the shippers of Germany that Ballimore offers them a port of entry which is at least two hundred miles nearer than New York, the only other really available one on the Atlantic coast, to most of the great Western markets, and to all the markets of the Southwest and the South, Already are the ship brokers of Brokers o

Western markets, and to all the markets of the Southwest and the South. Already are the ship brokers of Bremen trying to inculcate this idea into the minds of their merchants. Handbills are being distributed noticing this fact, and also the fact that steamers are landing at the wharf of the Baltimore and Ohio Rallroad Company, and that goods can be shipped at once into cars, without being subjected to heavy charges for storage and drayage. The advantages which Baltimore offers are, owing principally to the establishment of this line, attracting attention in Bremen, and by last advices there were no less than twelve ships loading there for this port. For New York there were only fourteen. There were none to Boston, one to Philadelphia, and two to New Orleans.

The future of this line, and the benefits to be derived from it by every merchant and property owner in this city cannot be properly discussed in the limits of a newspaper article. It is asfe, however, to say that since the laying of the first stone of the Baltimore as this Pioneer Continental European Line. It will be gratifying to every one to know that there is a full complement both of passengers and freight already secured for the two succeeding voyages from Bremen. Indeed, so favorable are the prospects that it is anticipated that within a very short space of time arrangements will have to be made for a semi-monthly line.

Comport for Johnson if he goes back to his old trade in Tennessee: "It is never too late to mend."

CONARD—On the 9th inst., at the residence of her sister, in Zanesville, Ohio, HANNAH CONARD, dughter of Thomas Conard, dec'd late of this city.

Special Aotices.

o Toledo, and from
o Toledo, and from
nelisville road via. the Hempfield.

article is as follows:

The success which the new Bremen Line has met, has already exceeded the expectations of its most sanguine inaugurators, and has given to the world an example of enterprise where conception and consummation have gone hand in hand. In July, 1828, when ground was first broken on the Baltimore and Ohlo Railroad, it was considered a great event for the City of Baltimore, and the project bore upon its face such promise of almost immediate result, that even the least sanguine were enthusiastic.

But, forty years have since elapsed, But, forty EMINENT MEN ASSENT remety of the nineteenth century, whilst the proprietors warrant it in every case. Let-ters reach us every day from persons in every part of the land telling of the miraculous cures it has performed, whilst our best physi-cians are constantly urging us totell them the formula from which the mula from which it is made, saying its ef ects are wonderful, its success beyond al precedent, and its cures in even the most ag precedent, and its cures in even the most ag-gravated cases, as certain as sunrise. It will alop distress after eating in a moments time; sweeten a sour stomach as soon as taken; re-lieves pains or cramps in stomach or bowels unstantaneously, and enable the Dyspeptic sufferer, who has lived on Graham bread and the plainest diet, to eat a hearty meal with-out fear of any trouble from it.

Sold by all Respectable Druvgists.

For sale by all first-class dealers in th United States and British Provinces.

AMERICAN WALTHAM WATCHES THE HEST!! THE CHEAPEST!!

THE EXTENSIVE USE OF THESSE.

Watches by Rallway Conductors, Engineers, and Expressmen, the most exacting class of watch-wearer, has thoroughly demonstrated the strength, steadiness, durability, and accuracy of the Waltham Watch. To satisfy that class in all these respects is to decide the question as to the real value of these timekeepers.

More than 500,000 are speaking for themselves in the pockets of the people.

Imported Watches are made on an expensive system, in small numbers, but by nuserous makers, and are piaced in the market here by an Importer who first secures a Monopoly of Sale of some one Manufacture.

A Custom-house duty of 25 per cent, payable in Gold.

A profit of at least 25 per cent to the Importer, another profit to the Jobber: thus nearly doubling the cost of the imported watch.

At Waltham, Watches are manufactured on a large scale, under one roof and system of supervision and management, thereby saving many of the expenses necessarily incurred in small establishments; hence their great cheapness.

All respectable dealem now sell Waltham THE BEST!! THE CHEAPEST!!

CHEAP! SIMPLE! ECONOMICAL

This wonderful invention is attracting wide-spread attention. It is a simple device; made of tin, comprising researching, which can be used together or separately. The water which steams the fold is rapidly distilled into a delicious soup. The seen in the placing in one sections, turnings, polatoes, &c., &c., &c., and steaming two or three kinds of puddings at the same time—without the alightest change of flavor. It is a philosophical result which astonishes all, and has given the steamer a popularity never equalled by any cooking invention.

Every family should have one. No family can afford to be without it. It will pay for itself in a very short time.

Splendid opportunity for Agents and for investment in rights,
